Software Engineer

WIth a background in biological sciences, I bring strong analytical skills to tech projects with a desire to create an impact. After experimenting with programming class in college, I discovered that I had a passion for software development. After some self-led learning, I decided to make the leap and join Flatiron School's bootcamp to jumpstart my career. Experienced in Ruby on Rails and JavaScript based programming and a background in React with Redux. Possess strong skills in team-building and project management that help drive teamwork and increase client satisfaction. Passionate about learning new things and staying current with the technology.

TECHNICAL SKILLS

Ruby, Rails, SQL, JavaScript (ES6), React, Redux, HTML, CSS

TECHNICAL PROJECTS

WebMart - github| demo
A mock e-commerce app allowing users to add/search for items.
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Fetched seeded images from a cloud-based storage.
- Allowed for adding/removing items to/from a user's shopping cart.
- Used hooks to access app lifecycle.

Portfolio Website - github | portfolio
Website showcasing my resume and skills.
- Developed using a reactJS front end and NodeJS backend.
- Built to be fully responsive on PCs and mobile devices.

Mama Bear - Github | Demo
Ecommerce site for a non profit organization allowing for the tracking and selling of used clothing.
- Engineered user interface with javascript for a responsive user experience.
- Developed a postgres database with a user friendly access to edit and add information.
